

CURRENT CONCEPTS IN HEAD & NECK CANCER CARE: A MULTIDISCIPLINARY MANAGEMENT APPROACH

**SATURDAY 29
APRIL 2017
8:30AM-5:00PM**

Lecture Theatre B, Level 7
Peter MacCallum Cancer Centre
VCCC building, 305 Grattan Street
Melbourne 3000 VIC

In this one day course we will review the current evidence supporting the multi-disciplinary care of head and neck cancer patients, including expert panel presentations and case discussions.

The workshop will be valuable to Surgeons, Radiation and Medical Oncologists, Allied Health Clinicians, Nurses, and Dentists who wish to review and update their knowledge of head and neck cancer management. Interested medical professionals and health practitioners from other fields are also invited to attend.

Topics covered include

- The role of panendoscopy in the era of modern imaging
- Management of head and neck cutaneous malignancies
- Optimal resection margins for oral cavity cancers and reconstructive options
- Radiation in the management of oropharyngeal, laryngeal and hypopharyngeal cancers and the role of transoral robotic resection
- Systemic options in head and neck cancer management
- Multi-disciplinary management of thyroid cancers
